Shaurya Ojha

AI Product Developer | Frontend Developer

BS in Applied AI & Data Science, IIT Jodhpur | shauryaofficial06@gmail.com | +91 9319649564 | LinkedIn | GitHub

EDUCATION

BS in Applied AI & Data Science — IIT Jodhpur — Pursuing

Diploma in Computer Science & Engineering — Completed | 2022–2025

PROJECTS

HireMind — AI-Powered Interview Preparation Platform

- Built and deployed an AI interview platform that uses candidate resumes, target roles, and interview context to deliver personalized interview practice.
- Implemented JWT authentication, password hashing, resume upload and PDF extraction, Gemini-powered resume analysis, and persistent PostgreSQL data using FastAPI and SQLAlchemy.
- Built RAG-based interview question generation with resume embeddings, pgvector similarity search, and ONNX Runtime using all-MiniLM-L6-v2.
- Implemented Mock Interview and Answer Practice modes with voice interaction, typed answers, preferred answers, adaptive follow-up questions, per-answer evaluation, candidate questions, and final performance reporting.
- Deployed the frontend with Vercel, backend with Render, and PostgreSQL with Supabase; optimized the embedding pipeline for constrained cloud resources.

AI-Powered Customer Complaint Management System

React, FastAPI, LangGraph, LangChain, Groq, OCR

- Built an AI-powered pharmaceutical complaint management system that extracts structured complaint information from natural-language input and complaint documents.
- Implemented a LangGraph workflow for complaint extraction, AI risk assessment, completeness checking, summary generation, and targeted natural-language corrections.
- Integrated FastAPI with React and added PDF text extraction and Tesseract OCR for scanned complaint documents.

PathPilot — AI-Powered Career Guidance Platform

- Developed an AI-powered platform that creates personalized career roadmaps for students.
- Designed and implemented a responsive frontend and integrated AI-based recommendations for customized career guidance.
- Worked across planning, development, testing, deployment, and maintenance of the product workflow.

EXPERIENCE

Independent Projects / Self-Directed Development — Current

- Built and deployed modern web applications integrating frontend technologies, backend APIs, databases, AI services, and third-party APIs.
- Worked across product planning, UI development, backend/API development, database integration, testing, debugging, and deployment.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Responsive Web Design, Framer Motion

Backend & Database: Python, FastAPI, Node.js, Express.js, PostgreSQL, SQLAlchemy, MongoDB, REST APIs, pgvector

AI & LLM: LangChain, LangGraph, Gemini API, Groq, RAG, AI/LLM Integration, Prompt Engineering, AI Product Development Document Processing: PDF Text Extraction, Tesseract OCR, PyMuPDF, Pytesseract

Tools & Deployment: Git, GitHub, VS Code, Vercel, Render, Supabase, Figma, ONNX Runtime
